## PROJECTS

### Portfolio Website

📅 01/2025

🔗 <https://ajinkyachavan-portfolio.netlify.app/>

This is my responsive portfolio website made using React.js and Tailwind CSS, showcasing my skills and projects in an engaging and visually appealing manner. The site features seamless navigation, interactive animations, and dynamic elements to enhance user experience.

### Image-Processor

📅 01/2025

🔗 <https://github.com/FrozenFalcon-Byte/Image-Processor>

This is a python application made using streamlit library which helps to process images in different ways which include Text Extractor from Image (OCR), Remove Background From an Image, Summarize the details of an image using AI.

### Pokedex Application

📅 12/2024

🔗 <https://pokedex-ajinkya.netlify.app/>

This project is a responsive web-based Pokemon Pokedex inspired the the Pokemon game. It is built using HTML, CSS, JS and the PokeAPI which is available for free to use.

### ReFound

📅 09/2024 - 10/2024

ReFound is a group project aimed at reducing waste and helping those in need by repurposing items close to their expiry date. Through our research, we discovered that many products are discarded due to their expiry dates, even though they are still usable.
